PERSONAL PROFILE

I'm a Full Stack Web Developer with experience building out both consumer and startup applications, including web and mobile applications with the latest technologies. I am also conversant with computer hardware management and networking.

SKILLS

o Worked with advance web development technologies like React, Node, JavaScript, Ruby, Bootstrap, CSS, HTML and JSON
o Proficient in working with database technologies such as SQLite Database Browser, Firebase and MongoDB
o Expertise in development of cross-platform mobile applications in Dart (Flutter).
o Able to create and host sites through technologies like WordPress
o Experience using version control systems such as Git.
o Operating system and applications installation and management
o Team management
o Critical thinking

PROJECTS

E-waiter App - https://e-waiter.vercel.app/

This is a restaurant app, built with react and firebase, that helps the restaurant by letting the customer choose a dish and order. Human waiters will only be delivering the dishes to the tables that have ordered. This app can also be accessed from a QR code that will be on the tables

Techware Website - https://techware.co.ke/

This is an ecommerce website that deals with computer products. I have implemented it to use paypal as a payment method. The site was created using wordpress and elementor
